

Dear Sir/ Madam,

TeamTalent is a Belgian company that selects nursing staff from European countries. Our client, the largest company specialized in geriatric care in Belgium, is looking for ambitious nurses to work in Belgium in an innovative and dynamic work environment. Their values are: quality of life, empathy, offering the warmth of a home and adapted personal care.

The vacancies are for the northern Dutch-speaking part of Belgium. Therefore, an intensive Dutch course of 10 weeks is foreseen.

The company also provides a total relocation service for each individual, as well as all administration needs (homologation of the nursing title, social security, banking, etc....). All of these services are free of charge for the nurse.

The job interviews will be held via Skype in English, French or Spanish, and if selected, the candidates are allowed to follow the Dutch course. The next course starts on the 16th of April 2018.

Could you please inform your students about this opportunity? Attached you will find the vacancy in Italian. We would be grateful if you could also include this job offer in your website.

We thank you for your kind cooperation.

Feel free to contact me if you require additional information.

Best regards,  
Catharina Hoenderkamp
